PASSWORD SECURITY AWARENESS

STRONG PASSWORDS

START WITH A PASSPHRASE

Four simple habits that keep your accounts, and the bank, safe.

A STRONG PASSPHRASE

crystal onion clay pretzel

4 or more random words, at least 14 characters. Long, easy for you to remember, hard for attackers to guess.

NOT THIS

~~P@ssw0rd1!~~

Short, familiar words with swapped symbols are easy to guess.

WHAT MAKES A PASSPHRASE STRONG?

LONG

Aim for 14 or more characters. The longer it is, the harder it is to crack.

UNPREDICTABLE

Pick random, unrelated words. Avoid names, dates, quotes and song lines.

UNIQUE

One passphrase for every account. Never reuse, never share.

MAKE IT EASY TO KEEP THEM SAFE

USE A PASSWORD MANAGER

A reputable manager creates, stores and fills strong passwords. You only remember one passphrase.

TURN ON MFA

Multi-factor authentication adds a second step, like a code on your phone. ACSC calls it one of the most effective protections.

Spot a suspicious email asking for your password?

Do not click. Report it to roua24@cybersafety.com
